

Directions: Dissolve 1 tablet under your tongue daily or as directed by your health care practitioner.

Activ B12 is a great tasting, sublingual tablet providing 5 mg (5000 mcg) of Vitamin B12 in one of its two co-enzyme forms. This active methyl form has metabolic and therapeutic advantages over other forms of B12. Studies show more cobalamin deposited in tissue with methylcobalamin vs cyanocobalamin supplementation. Besides supporting the development of healthy red blood cells, methylcobalamin has been shown to have particularly enhanced ability to support neurological function.*
